

S/N 10/805,844

Response to Office Action Dated Aug 22, 2005

**In the Claims**

1-3. (Canceled)

4. (Currently Amended) ~~The apparatus of claim 1~~ An apparatus for receiving and retaining an independently powered light, the apparatus comprising:  
an elongated molded body having a first aperture extending through the length of the elongated molded body wherein the first aperture is adapted to receive and retain the independently powered light therein and a second aperture extending through the length of the elongated molded body wherein the second aperture is adapted for attachment to a tool, wherein and the elongated molded body has a third aperture extending through at least a portion of the length of the elongated molded body.

5. (Original) The apparatus of claim 4, wherein the third aperture is configured to receive and retain a power source for the independently powered light.

6. (Currently Amended) The apparatus of claim 6 ~~5~~, wherein the power source comprises a battery.

7. (Currently Amended) ~~The apparatus of claim 1~~ An apparatus for receiving and retaining an independently powered light, the apparatus

S/N 10/805,844

Response to Office Action Dated Aug 22, 2005

1 comprising:

2 an elongated molded body having a first aperture extending  
3 through the length of the elongated molded body and a second aperture extending  
4 through the length of the elongated molded body;

5 wherein the first aperture is adapted to receive and retain the  
6 independently powered light therein and the second aperture is adapted for  
7 attachment to a tool; and

8 wherein the second aperture has threads therein adapted to mate  
9 with the tool, ~~wherein~~ and the tool has complimentary threads.

10  
11 8. (Currently Amended) ~~The~~ An apparatus ~~of claim 1~~ for receiving  
12 and retaining an independently powered light, the apparatus comprising:

13 an elongated molded body having a first aperture extending  
14 through the length of the elongated molded body and a second aperture extending  
15 through the length of the elongated molded body;

16 wherein the first aperture is adapted to receive and retain the  
17 independently powered light therein and the second aperture is adapted for  
18 attachment to a tool; and

19 wherein the second aperture is configured to receive a notch-key  
20 protruding from the tool.

21  
22 9-12. (Canceled)

23  
24 13. (Currently Amended) ~~The apparatus of claim 10,~~ An apparatus for  
25

S/N 10/805,844

Response to Office Action Dated Aug 22, 2005

1 receiving and retaining an independently powered light, the apparatus comprising:

2 a removable elongated molded body having an upper portion with a  
3 first aperture therethrough and a lower portion, wherein the upper portion is  
4 configured to receive and retain the independently powered light, and wherein the  
5 elongated molded body has a second aperture through the lower portion; and

6 a tool configured to receive the elongated molded body about the  
7 second aperture;

8 wherein the elongated molded body comprises a third aperture  
9 extending through at least a portion of the lower portion below the second aperture  
10 and adapted to receive and retain a power source for the independently powered  
11 light.

12  
13 14. (Original) The apparatus of claim 13, wherein the power source  
14 comprises a battery.

15  
16 15. (Currently Amended) ~~The apparatus of claim 10~~ An apparatus for  
17 receiving and retaining an independently powered light, the apparatus comprising:

18 a removable elongated molded body having an upper portion with a  
19 first aperture therethrough and a lower portion, wherein the upper portion is  
20 configured to receive and retain the independently powered light, and wherein the  
21 elongated molded body has a second aperture through the lower portion; and

22 a tool configured to receive the elongated molded body about the  
23 second aperture;
